2. Christophorus Johannides van Zopit

Egan Am Decker

The first of these is the fact that the
 world is not a uniform place. It is
 full of differences and contrasts. The
 climate varies from the hot tropics to
 the cold poles. The people vary from
 the primitive tribes of the jungle to
 the advanced civilizations of the
 world. The customs and traditions
 vary from the simple life of the
 nomads to the complex life of the
 city dwellers. The language varies
 from the primitive grunts and
 groans to the sophisticated
 languages of the world. The
 religion varies from the primitive
 animism to the advanced religions
 of the world. The art varies from
 the primitive cave paintings to the
 sophisticated art of the modern
 world. The science varies from the
 primitive superstitions to the
 advanced sciences of the modern
 world. The technology varies from
 the primitive tools of stone and
 bone to the sophisticated
 technology of the modern world.
